

The Airease features

*our revolutionary new
“ambient air” comfort cells.*

*By allowing air to flow through the
the back and seat,*

*Airease helps create a cooling effect that both
wicks away moisture from the skin and reduces
uncomfortable hot spots.*

*Please contact your local ChairWorks
Sales Representative for more information.*

*Introducing the
New Airease Series*

Welcome to Airease,

featuring ventilated memory foam in the lumbar back and seat.

When ambient temperatures are neutral, the body will maintain thermal equilibrium without uncomfortable sweating or shivering. By allowing air to circulate very effectively around the spine and thighs, Airease helps promote a balanced body temperature.

From concept to creation, this innovative chair was designed to

meet the needs of today's working environment. It combines contemporary styling with the unique benefits of the floating synchro technology.
